

## Introduction to Vertical Mapper

Two Day Course

[Contact](#) us for information on holding a training class on-site at your location.

**Important: A thorough knowledge of graphical interfaces (Windows 7, Windows VISTA, Windows XP, Windows NT or PowerMac) is a pre-requisite.**

This course is taught using Vertical Mapper. The introductory course is designed to demonstrate and explore the core features of Vertical Mapper. End users will benefit from this dynamic hands-on course by gaining an understanding of grid technology and "smart raster" analysis.

## The Introduction to Vertical Mapper Course Covers:

- Grid Creation
- Triangular Irregular Network
- Inverse Distance Weighting
- Rectangular Interpolator
- Colorizing a Grid
- GridView
- Contouring a Grid
- Data Aggregation
- Grid Math
- Natural Neighborhood Analysis
- Viewpoint Analysis
- Location Profiler Model
- Trade Area Analysis (Huff Model)
